**In the video project 'Fensterbild'** the reflection of a DDR prefabricated building on a slowly opening window pane moves past the viewer. With each degree of window movement a further piece of the grid-structured functional building of the Dresdner Robotron slips into view. The actual architecture, however, can only be seen as a mirror image that, on the other hand, manifests itself as a video image. The curious poetic of this manifestation stands in clear contrast to the plain architecture of the Robotron that fleetingly rotates inside the room.
